Phase 10: Final Presentation & Demo Day

 In this phase, the completed Salesforce PulsePro - Hospital Appointment & Patient Management application is showcased through a professional pitch and live demonstration. Pitch Presentation

● The pitch presentation was prepared to highlight the objectives, key features, and benefits of the application.

● It demonstrates the end-to-end workflow, including patient management, doctor assignments, appointment scheduling, and treatment tracking. ● The presentation reflects the project design, implementation, and the practical value for hospital operations. Demo Walkthrough

● A live demo walkthrough was conducted to illustrate the functionality of the application. ● Key demonstrations included:

- Creating and managing patient records.
- Linking doctors to patients using the DoctorPatient junction object.
- Scheduling and assigning cases (treatments).
- Viewing dashboards and reports for monitoring patient and doctor activities. Handoff Documentation

● Comprehensive documentation covering Phases 1 to 10 has been uploaded to GitHub.

 ● Documentation includes:

- ○ Objects, fields, and relationships
- ○ Validation rules and automation flows
- ○ Page layouts, record pages, and compact layouts
- ○ Reports and dashboards ○ Step-by-step user guides for Doctor, Receptionist, and Manager roles
